

UC! Web - Track & Trace™ Asset Tracking Software

A2B Tracking Solution's web-based asset tracking software module, **Track & Trace™** is designed to control and manage assets, in addition to providing UID data management and compliance. It allows for management of assets to a location, missing from a location, and asset use by custodian.

FEATURES:

- Track using 2D barcode scanners to the desktop or mobile computer
- Scan to move – quick and accurate
- Scan to transfer – scan items or sets to a new location
- Inventory control with reconciliation
- Mobility with laptops, tablets, or smart phone devices
- Location summary reporting
- Multi-level location management
- Assignment of property by user
- Unlimited named user accounts

ABOUT A2B:

A2B Tracking Solutions is the leading provider of UID products and services. Our lifecycle data management software solutions are considered the gold standard for MIL STD 130 compliance. A2B's UC! Web – Track & Trace™ software module leverages UID data for asset tracking.

A2B TECHNICAL SUPPORT:

Our customers constantly praise our tech support. That's why we're rated 93 out of 100 on D&B's Open Ratings for customer satisfaction. A2B support is available either by phone, or one of our knowledgeable certified technicians can link directly to your workstation and solve the problem via remote access technology.
